

Officials of the FCC, please take note that since the inception of the "do not call list", my family and I have had peace and quiet. I do NOT want solicitation telephone calls from companies and consumers should not have to buy expensive services from telephone companies to avoid these harassing telephone calls on telephone lines that we already pay top dollar for! If I want to buy something trust that I will seek them out, I don't want them calling me. Please, DO NOT do away with NJ's do not call list.
